## Summary

Final-year Information Technology undergraduate with a strong foundation in Java, Python, data structures and algorithms, SQL, and object-oriented programming. Hands-on experience building backend applications and REST APIs using Spring Boot and Flask. A quick learner with strong problem-solving abilities, effective communication skills, and a collaborative mindset eager to cross-skill across technologies and grow as a Full Stack Engineer in a fast-paced enterprise environment.

## Education

### B.Tech in Information Technology

M. Kumarasamy College of Engineering, Karur  
CGPA: 7.87 (Current)  
Aug 2023 – Present

### Higher Secondary Certificate (HSC)

Gandhi Matric Higher Secondary School, Namakkal  
Grade: 86%  
Jun 2022 – Jun 2023

## Skills

- **Languages:** Java(Proficient), Python(Proficient), SQL(Intermediate), C(Basic)
- **Frontend Development:** HTML, CSS, JavaScript, React
- **Backend Development:** SpringBoot, Flask, REST APIs, Postman, Node.js
- **Databases:** MySQL, MongoDB, SQLite, Oracle Database
- **Cloud & Tools:** Git, Github, Google Cloud, IntelliJ IDEA, Supabase
- **Soft Skills:** Leadership, Problem Solving, Adaptability, Time Management

## Projects

### Music Genre Classification – AI/ML-Based Predictive System [🔗 Code](#)

Dec 2024

- Developed a machine learning application to classify music genres using audio features. Compared multiple algorithms to improve prediction accuracy of 92.5%.
- Deployed a web application for real-time genre prediction and result visualization. Enabled users to upload songs and receive instant predictions.

### Vehicle Service Center Management System – End-to-End Automation Platform [🔗 Code](#)

April 2025

- Developed a web-based platform to automate service booking, mechanic assignment, billing, and inventory management. Reduced manual booking/billing time by 40% through centralized automation for 3 core workflows.
- Implemented role-based access, live service tracking, email notifications, and analytics dashboards. Improved workflow visibility and operational efficiency.

### AutoQuizzer – AI-Powered Quiz Generation & Assessment Platform [🔗 Code](#)

Nov 2025

- Built an AI-powered platform that processes multiple document formats to generate assessment-ready quizzes within seconds, significantly reducing manual effort for educators.
- Integrated user authentication, automated scoring, performance tracking, and analytics. Enabled a seamless experience for both instructors and students.

## Research Publication

- **IEEE Publication:** AutoQuizzer: AI-Powered Quiz Generation & Assessment Platform – ICECMSN (2025)
- **Granted Patent:** A System for Managing Operations of Multiple Faces in Emotion Detection Process – South African Patent No. 2025/06317, Granted under the South African Patents Act, 1978 (2026).

## Certifications

- Oracle Certified – Data Science Professional (2025)
- Cisco – Ethical Hacking (2025)
- Hashgraph - Web Development (2025)

## Areas of Interest

Backend Development, Artificial Intelligence and Machine Learning, Database Management Systems
